# Microsoft® SharePoint Consulting

Increase collaboration and streamline information access.

Cost containment initiatives force many operating managers to find ways to get more done with fewer people. So maximizing team productivity has become one of the greatest challenges facing organizations today. ePlus® Consulting focuses on helping clients dramatically increase team and individual productivity. How? By creating SharePoint-based web portals that address the drivers of productivity.

A SharePoint portal designed and built by ePlus Consulting will help you:

- + Enable **collaborative** problem-solving leading to more effective and innovative solutions
- + Improve access to **information** to support enhanced decision-making capabilities
- + Create automated, online **workflows** to facilitate consistent, predictable, and measurable performance
- + Enhance your ability to share **knowledge** and make everyone on your team more capable
- + Establish a medium for clear and timely **communications** to handle fast-moving projects and operational activities

Our SharePoint Consulting Team combines in-depth business knowledge with extensive experience with SharePoint Technologies. We help our clients rapidly deploy intranets and extranets that provide competitive advantage and rapid ROI. Results are delivered faster and more cost-effectively than can be done using scarce internal resources, and benefits are often realized within weeks.

### ePlus Expertise with SharePoint

ePlus SharePoint consultants are skilled with the features and capabilities of SharePoint, software application development, and database design.

**Company Intranets** – ePlus can implement SharePoint intranet solutions that:

- + Provide employees with easy access to departmental information, including forms, policies, and procedures
- + Distribute news and information without overwhelming your email system
- + Manage and track projects; provide visibility to progress
- + Support company-wide collaboration on operating plans, budgets, audits, and compliance to reduce the expense of these necessary activities
- + Integrate applications and web activities through a common portal that is easy to use, update, and administer

**Company Extranets** – ePlus extranet solutions built on SharePoint can:

- + Enable online customer service for all of your customers and stakeholders
- + Supercharge your customer service experience with value-added online services
- + Enhance productivity of your customer support and help desk

For more information about our SharePoint Implementation Methodology, contact ePlus at 888-482-1122 or visit us on the Web at [www.eplus.com/consulting](http://www.eplus.com/consulting).

EXCELLENCE THROUGH EXPERIENCE

**Reduce Costs and Boost Productivity**

ePlus consultants transform the out-of-the-box SharePoint platform into a powerful communication and collaboration environment that will streamline your business processes, lower operating costs, and improve productivity - FAST.

Here are a few examples of how our SharePoint solutions can help you generate ROI and hone your competitive edge:

**Employee Administration** – A corporate portal promotes Human Resources documentation to reduce call volume to HR, make it easy for employees to access forms, policies and procedures, and help satisfy compliance.

**IT Department** – The customized ePlus IT Portal features help desk, asset management, project management, and application integration to greatly improve IT department productivity and service levels offered to end customers.

**Professional Services** – Accounting and law firms can provide client portals that enable outstanding customer service, provide the customer with easy access to their personal information, and enhance the client-professional relationship.

**Analytics Portals** – Aggregate, normalize, and report on critical business data. Manage your business based in facts and information rather than guesswork. Better, more informed decisions lead to greater business success and lower risk.

**Technical Expertise**

As a Microsoft Certified Solutions Partner, ePlus Consulting is highly qualified to design, develop, and deploy custom enterprise solutions on the SharePoint platform. Our areas of expertise include:

.Net Technology	Integration	Database Technology	Analytical & Reporting
Visual Studio .NET C# and Visual Basic® .NET ASP .NET	XML Technology EDI InfoPath	SQL Server Oracle Microsoft Access ODBC	Business Objects Crystal Reports Microsoft Report Server

**AllShore™ Outsourcing and Development**

ePlus Consulting's exclusive AllShore service is designed to optimize outsourcing costs for development projects of any size and complexity.

With dedicated development resources in the United States and India, ePlus Consulting's AllShore service can allocate development work to the location best suited to meet requirements at the lowest possible cost, while keeping project management under the tight control of stateside ePlus/client project teams.

**The Results You Expect – Without the Risk**

ePlus Consulting takes a highly-collaborative, risk-managed approach to every project. The result is a close, continuous alignment between requirements and the evolving solution—and fewer surprises late in the project. So when we deliver, you get exactly what you are expecting and what you need to improve your business.

**About ePlus Consulting**

ePlus Consulting offers services to help team and individual productivity. We offer practices in three areas:

- Web portals that help address the five drivers of productivity: information, collaboration, knowledge, process, and communications
- Data management and business intelligence that help create visibility to critical business data and a means to present that data in a meaningful way
- Custom software solutions to help businesses optimize processes, reduce costs, and increase profitability.

ePlus Consulting clients have demonstrated improved operational performance in finance, sales, supply chain management, customer service, engineering, manufacturing, professional services, and much more.
