

# Modernize team collaboration with AI-powered solutions

Transform how your teams connect and work with Cisco's portfolio of AI-native tools delivered by ePlus .

## Today's collaboration needs are more complex

Many organizations still rely on siloed, legacy tools that slow down teams and overtax IT. Hybrid work demands smarter technology and seamless experiences everywhere.

40% of office interactions are hybrid, driving higher demand for smarter collaboration tools.<sup>1</sup>

46% of employees say insufficient video and audio endpoints across meeting rooms cause ineffective meetings.<sup>1</sup>

2 to 10 minutes are lost per meeting due to scheduling and joining issues, leading to higher operational costs.<sup>2</sup>

## Reimagine your workspaces with AI-enabled Cisco tools

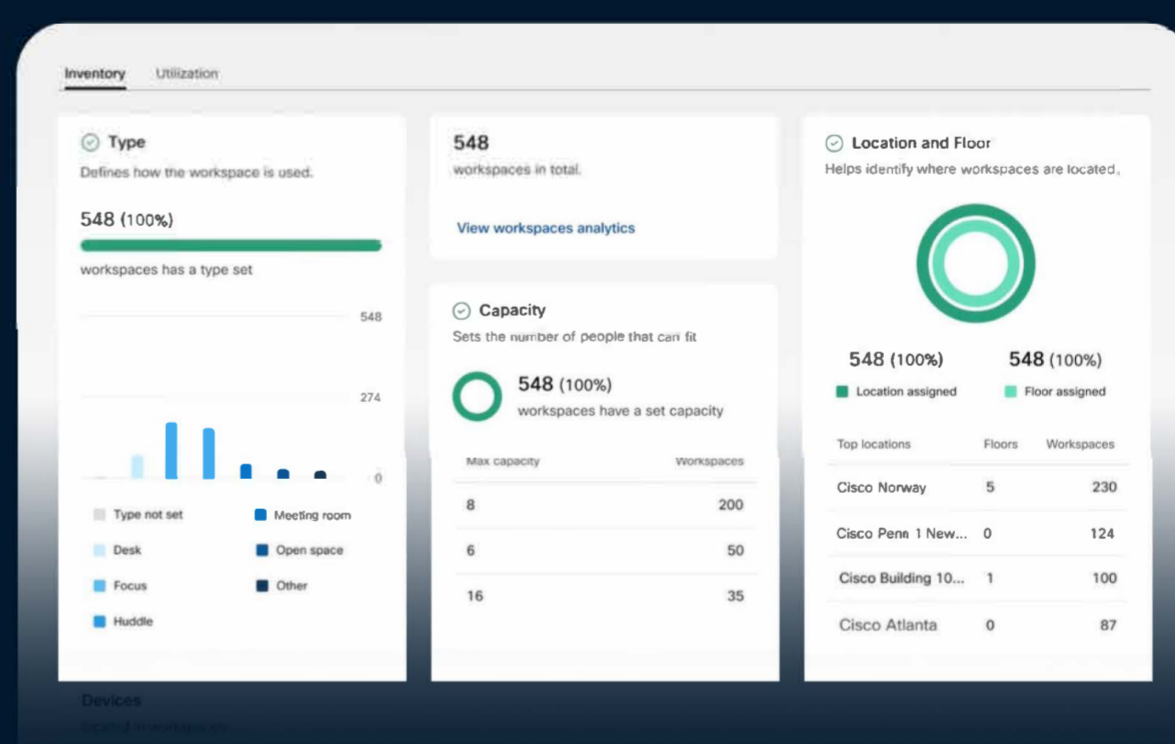

Cisco empowers teams to work at their best with secure, intelligent, and flexible collaboration tools that take meetings far beyond basic connection.

Cisco devices			Webex Suite
Headsets	Phones	Boards	  Cisco Webex App with AI Assistant
Cameras	Room bars and kits	Desk devices	
<b>AI-powered features</b>			
<ul style="list-style-type: none"> <li>AI noise removal</li> <li>Intelligent framing and smart speaker tracking</li> <li>Touchless join and voice-activated controls</li> <li>Personalized hot desking with secure access to user profiles and settings</li> </ul>	<ul style="list-style-type: none"> <li>Intelligent views and layout optimization</li> <li>Whiteboarding from any meeting platform</li> <li>Microsoft Teams certified and interoperable with any meeting platform</li> </ul>	<ul style="list-style-type: none"> <li>Automated summaries and follow-ups</li> <li>Voice-commands and live transcription</li> <li>Intelligent messaging and replies</li> <li>Smart search and highlights</li> </ul>	

## Gain secure, unified management from a single dashboard

Control Hub gives IT complete visibility and control across the entire collaboration environment, including third-party devices. With a single dashboard, IT can manage meetings, messages, and devices in real time while enforcing policies and troubleshooting issues.

Security is built into every product managed through Control Hub, with enterprise-grade encryption and unified threat visibility that safeguards users, data, and devices without straining IT.

## The Cisco advantage for smarter collaboration

95% of Fortune 500 companies trust Webex, as do many of the most influential brands of all sizes.<sup>1</sup>

81% of remote and in-office workers experienced significantly more effective meetings with Cisco AI-powered devices.<sup>2</sup>

204% ROI

with Webex Suite through cost savings, improved collaboration experiences, and dramatic gains in IT efficiencies.<sup>3</sup>
