

Stop SaaS Breaches Today

Get Started with a Complimentary SaaS Security Risk Review

Did you know?

- There was a 50% year-over-year increase in access broker activity in 2024¹
- 38% of organizations have experienced at least one software as a service (SaaS) app breach²
- SharePoint and Outlook were accessed in 22% and 17% of relevant intrusions, respectively.

Adversaries are exploiting the expanding attack surface created by business-critical SaaS apps. Visibility into your SaaS application security posture is the first step to staying ahead.

What you'll get

CrowdStrike experts will provide:

Instant visibility into the risks in your SaaS environments

Insights into security gaps, including misconfigurations, weak multifactor authentication (MFA) and single sign-on (SSO), and overprivileged accounts

Expert guidance on protecting against SaaS-based threats, such as hybrid lateral movement and brute-force attacks

Get started now

1. [Request](#) your complimentary SaaS Security Risk Review
2. Engage in a 1:1 session with a SaaS security expert
3. Identify immediate opportunities to strengthen your SaaS security posture
