

ePlus and IBM Get it

IBM® is one of the largest technology companies in the world and is best known for developing and manufacturing high performance Servers, Storage Systems and Software for Automation, Data & AI, Security, and Sustainability.

The Value of ePlus & IBM

IBM supports technologies focused on Security, Data & AI, Automation, Sustainability, Storage, and Servers across a wide range of industries from large corporations to small businesses.

ePlus brings together the IBM technology expertise and services to help our clients solve their business problems.

Software

Security

IBM Security™ delivers an integrated system of threat analytics, data protection and identity management to safeguard today's multicloud IT environments.

- IBM QRadar® SIEM
- IBM Resilient® SOAR
- IBM Guardium® data security
- IBM Security Verify®

Data & AI

IBM's AI and multicloud technologies unlock the value of your data, enabling you to predict and shape future outcomes, empower people to do higher-value work and deploy AI capabilities at scale.

- IBM watsonx™ AI and Data Platform
- Business Analytics
- Cloud Pak for Data
- Data Fabric
- Business Automation

Sustainability

Optimize operations and cost while reducing waste and emissions with IBM's data-driven sustainability technology and consulting solutions.

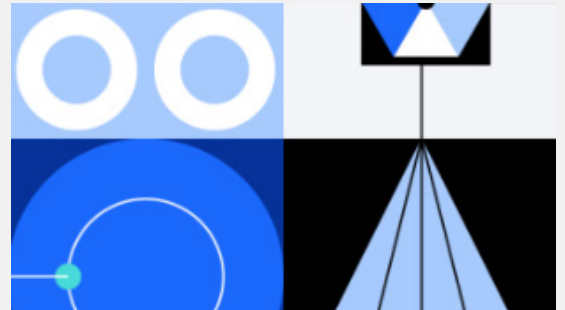

- IBM Maximo
- IBM Engineering Lifecycle Management
- IBM Sterling Order Management

Automation

Whether you want to automate complex IT operations that span the entire organization or automate repetitive business tasks, IBM's AI-powered automation reduces manual processes.

- IBM Software Networking (Observability, Automation, and Connectivity)
- IBM Turbonomic
- IBM Instana

HYBRID INFRASTRUCTURE

Storage

IBM Storage is engineered to meet your modern, high-performance requirements: ultra-low latency; cost-effective, operational efficiency; and mission-critical reliability.

- IBM FlashSystem Storage
- IBM Scale
- IBM Fusion
- IBM Storage Defender

Servers

IBM Power Servers are built with open technologies that support new applications and unlock next-generation analytics along with other high-performance applications such as EPIC and SAP HANA:

- IBM Power Servers
- IBM Power Virtual Server Cloud
- IBM Power Cloud
