

Resident Engineer

Stop waiting, start doing. Complete your projects smarter and faster.

Finding resources is a challenge, especially when you're juggling tight deadlines and network upgrades to **drive network and subscriber growth**. Hiring a team of engineers offers a faster time to completion, and by augmenting your existing staff, you will **increase your ROI**. Mixed vendor environments are complex, but ePlus' team of experts support you from core to door.

Why It Works for Service Providers

You avoid hiring fatigue in a tough job market for engineers.

You avoid training time constraints and certification costs.

You shorten the gap between network installation and time to revenue.

You avoid the auxiliary costs associated with a full-time employee.

What are the Major Benefits?

You receive a certified, experienced team of engineers.

You access multi-vendor expertise across the network.

Reduce hiring internally.

Includes lab validation.

Hire a certified engineer backed by a team of architects today.
