3:
Integration Centers

2,100+:
Employees

4,600: Global Customers

5,500+:
Certifications and accreditations carried by ePlus staff from the top IT manufacturers in the world

Look beyond what's practical to achieve what's possible.

At ePlus, we believe that the future belongs to those who look beyond what's practical to achieve what's possible. We specialize in helping our customer organizations explore the "what ifs" — and to experience more than they could have envisioned on their own. With ePlus, they can experience the unexpected.

Our top priority is always to make sure that the services and solutions we offer are aligned with what our customers need to succeed. And, as our customers' technology needs, resource constraints and talent needs grow fast and furious, so too does the level of expertise ePlus brings to the table, along with a customized set of services and solutions developed just for them.
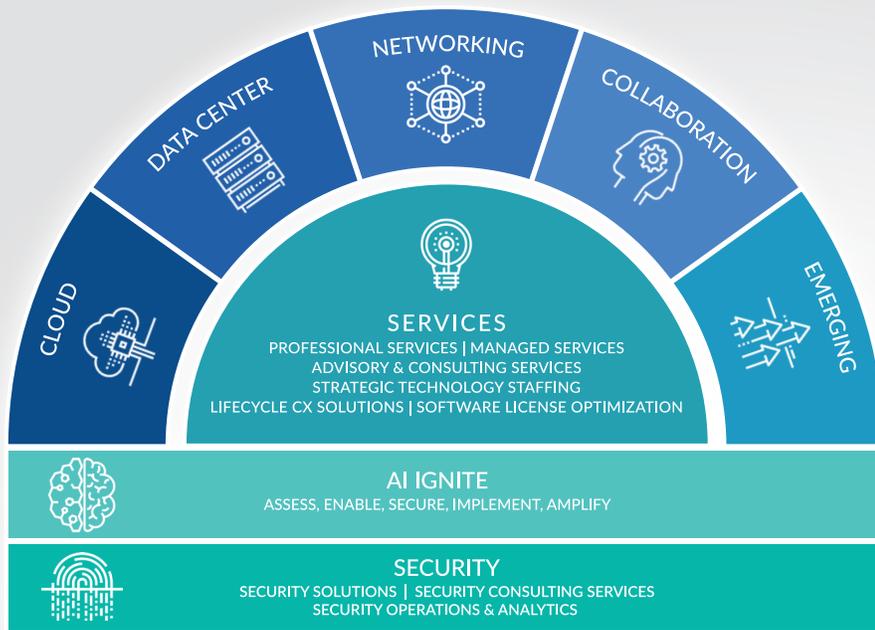

Why ePlus

ePlus moves beyond merely implementing IT solutions to harnessing technology and driving transformation. We help accelerate and reignite growth, enabling organizations to stay ahead of change, unlock new opportunities, accelerate progress, and achieve more than they ever imagined. Our offerings are comprised of a large portfolio of possibilities — spanning the technology lifecycle — developed to help position customer organizations to tap into unimagined opportunity and potential.

Behind every solution, every service, and every success story is a team of exceptional people — skilled, dedicated, and relentlessly driven to deliver extraordinary results. Some services are delivered by great technology. Some services are delivered by great people. By working with ePlus, customers get the best of both worlds.

SECURITY OPERATIONS & ANALYTICS

ARTIFICIAL INTELLIGENCE – Assess AI readiness, define use cases, decide to build or consume, help ensure a successful proof of concept, design, implement or manage an AI project.

CLOUD – Modernize your infrastructure, extend capabilities to cloud, accelerate migrations or optimize cloud platforms (and spend).
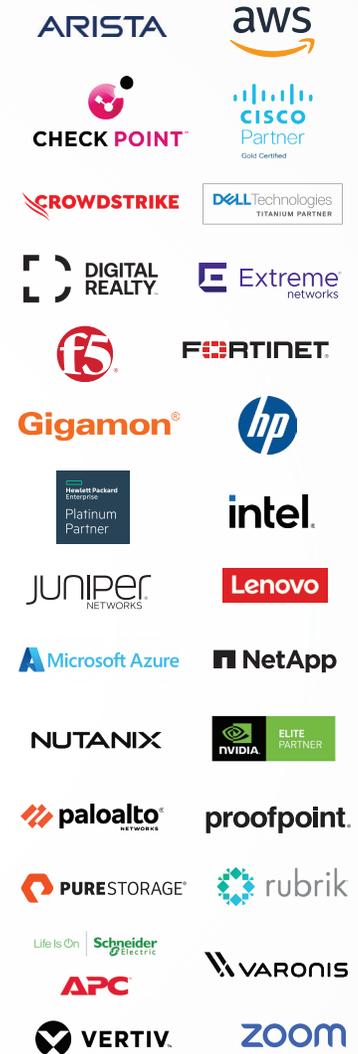

SECURITY – Ensure reliable, full coverage by design, from core to edge, with solutions, tools, intelligence and managed services that diagnose, predict, map, and protect your environment.

DATA CENTER and NETWORKING – Modernize your data center or storage, design and deploy next-gen enterprise and service provider networks to ensure that all domains are supported with high-performing, fault-tolerant, secure, intelligent and application-aware solutions.

COLLABORATION – Accelerate workplace/workspace transformation, enhance employee and customer experiences and ensure secure interactions with predictable cost models.

SERVICES – Maximize return on IT investments, facilitate implementations and enhance technology performance with consultative, advisory and managed services.
