

FREE NETWORK AND ENDPOINT ASSESSMENT AND REPORT

Discover Hidden Threats Lurking on Your Network

DO YOU HAVE COMPLETE VISIBILITY INTO EVERY ENDPOINT ON YOUR NETWORK?

Unknown network connections—including both wired and wireless devices—can indicate potential areas of risk and vulnerability.

Gain clarity into your existing security posture with a free network and endpoint assessment and report. Fortinet's network access control solution, FortiNAC, will perform an audit on your existing network, and provide you with a full report detailing your connections.

Sign up for your complimentary FortiNAC assessment to discover:

- Network connections that may be invisible on your current system
- Complete visibility into all network devices, including branch and global locations
- A full report including:
 - Network and endpoint inventory
 - All switch, port, and LAN information
 - Every MAC, IP, and VLAN combination on your network

This assessment can be completed in less than one day, giving you significant insight into your network with minimal investment.

Register now to see what FortiNAC can show you about your network.
