POWERING IT TRANSFORMATION

FOR ANY BUSINESS

Your IT infrastructure must transform along with the pace of business.

And IT professionals need solutions that can support them wherever they are in their transformation process. The answer? Comprehensive virtual infrastructure solutions that can address IT needs today and tomorrow, no matter the business or industry.

Network Virtualization & Security

Organizations of all shapes and sizes need more than just a secure perimeter. They also need lateral, internal controls to reduce malware propagation in the event of a breach.

VMware NSX provides multilayered security for all-sized organizations via:

Better security inside virtual environments
Fast deployment and adadptability

Automated provisioning and policies to follow changing workloads
A policy-driven approach and immediate disaster recovery options

Micro-segmentation

Easy integration with additional security services

Mobility & End-User Computing

Whether you need to manage 50 endpoints or 5,000, IT pros need mobile solutions that provide end-to-end security to keep users productive.

VMware AirWatch eases the IT strain of mobility management with a seamless user experience:
One-touch access to unified app catalog and corporate network

Delivery of key business applications
Device choice

Self-service portal for device management and controls

Streamlined & Automated IT Ops Management

An organization's size doesn't define the size of its software-defined data centers or the complexity of its hybrid cloud platforms. But complete solutions are needed to handle today's management and tomorrow's growth.

The VMware vRealize Suite helps companies of all sizes and industries manage public, private and hybrid clouds with a collection of VMware's most powerful cloud platform products (shown on the next slide)…

vRealize Automation
Automated delivery of personalized infrastructure, applications and custom IT services

vRealize Operations
Intelligent health, performance, capacity and configuration management

vRealize Log Insight
Highly scalable log management

vRealize Business for Cloud
Valuable insight for cloud costing, consumption analysis and efficient deployment

Helping your organization change with the times

Together, ePlus and VMware deliver powerful, proven virtual infrastructure solutions that enable organizations to maximize hardware and IT efficiencies:

- Up to 80 % increased server utilization*
- Lower server provisioning and repurposing time
- Reduced cost and complexity
- Lower risks during app rollouts
