The CIO Today:
Unpredictability from COVID causes a heightened focus on:

Cloud Acceleration  Collaboration  Remote Workforce Enablement  Security  Managed and Professional Services  AI: Analytics and Automation

“Business executives who experienced firsthand the shortcomings of legacy technology environments will suddenly demand that IT accelerate roadmaps for app and infrastructure modernization, refined service management, high-availability architectures, automation for speed and reliability, cloud for scale and flexibility, and a network that delivers high performance. The time to start designing for dependability is now.”
